## IX101 - Informix Physical Database Design

### Learning objectives

This course focuses on the physical creation of a database. The students learn how to convert the logical database design into a physical data model. Also various basic tools that are delivered with Informix are discussed.

### Topics covered

- Informix data types
- Creating tables
- Creating indexes
- Duplicate / Unique
- Cluster
- Introduction into SQL
- Changing data using DML
- Selecting data
- Creating constraints
- Extents and pages
- Calculating table size
- Introduction into database tools

### Audience

Database administrators and system designers. Including everyone who needs to create and alter database structures.

### Prerequisites

- Knowledge of the logical database design process or
- Informix Logical Database Design (IX100)
