IX107 - Setting up Data Warehouse Environments including Time-Varying Dimensions

Learning objectives

During this workshop the student will practice the development and implementation of a data warehouse with time-varying information. This course is set up as a best practices guide. Besides the normal approach also issues as -how to keep historic data up-to-date - are explained.

Topics covered

- All topics from -Setting up Data Warehouse Environments - (IX106) are discussed
- Determine time-varying information
- Solutions to store time-varying information
- How to handle updates
- How to handle corrections
- Calculate storage impact
- Optimize for speed and/or storage

Audience

Developers and database administrators of data warehouses.

Prerequisites

- Basic knowledge of Informix database design & SQL or
- Informix Database Design (IX108)
and Informix Structured Query Language (IX104)
