IX108 - Informix Database Design

Learning objectives

This course is a combination of the courses Informix Logical Database Design (IX100) and Informix Physical Database Design (IX101). This course however will not go into depth as the above-mentioned courses.

Topics covered

- Relational theory
- Entity-Relationship concepts and terminology (incl. ER diagrams)
- Normalization (incl. problems and denormalization)
- Describing attributes and domains
- Informix data types
- Creating tables
- Creating indexes
- Introduction into SQL
- Creating constraints
- Introduction into database tools
- Informix meta-data

Audience

Database administrators and system designers. Including everyone who needs to create and alter database structures.

Prerequisites

Not applicable
