## IX303 - Software Development in combination with Informix Dynamic Server

### Learning objectives

Many IT managers have the same problem: They have chosen for a specific DBMS (Informix in this case) and a specific development environment, but how these two can be combined is not completely clear. During our years of experience we have seen this very often. Especially for this problem we developed this workshop. During this workshop the student will learn how to program efficiently with an Informix Dynamic Server database.

### Topics covered

- Connection types such as: ODBC, JDBC and Native connections
- Open SQL or Native SQL
- Transactions
- Multiple concurrency and locking
- Business logic in the database or in the application
- Data security in the database or in the application

### Audience

Developers that need to develop or maintain application on an Informix Dynamic Server.

### Prerequisites

- Knowledge and experience with application development and
- Knowledge of SQL or Informix Structured Query Language (IX104)

### General information

Course code: IX303  
Duration: 2 days  
Skill level: Basic  
Delivery type: Workshop  
Price: EUR 1200, - excl. VAT

\* If there is only 1 participant on this course, we will add 50% on price mentioned above. (price level March 2009)
